The solid technological foundation empowers businesses technically, leading to innovation and progression in the real sense.

INFRASTRUCTURE MANAGEMENT

As IT infrastructure forms the back bone of any business enterprise, choosing the right set of infrastructure management services is very crucial in achieving the professional goals timely. At Addikiin, we help you in sufficing your IT requirements in synch with your business objectives to achieve a set target along with 20 -30% decrease in traditional IT costs. Addikiin offers an integrated suite of Infrastructure Management Services in the areas of:

❑ System Integration
❑ System Security
❑ Infrastructure Consulting
❑ Hosting Services
❑ Remote Infrastructure Management
❑ Desktop Management

IT HARDWARE

In a typical enterprising environment, the IT requirements essentially consist of hardware and software both. With a range of total IT solutions , Addikiin is also involved in hardware, network and software implementations. Services undertaken are listed below:

❑ Hardware Sales and Services

❑ Network Integration

❑ Peripheral Sales & Services

❑ System Maintenance & Upgradation

❑ Software Distribution

VIRTUALIZATION

Virtual machines provide centralized management, accelerate the operational efficiency and enhance the overall systems security. Virtualization has transformed the current scenario of managing the operational resources to a great extent. Multiple benefits can be attained via virtualization:

❑ Single server independently managing multiple applications and operating systems.

❑ Work requirements achieved on time as loads of work can be transferred quickly from one virtual space to another.

❑ Software and hardware resources are used more efficiently which results in accurate resource utilization and enhanced security.
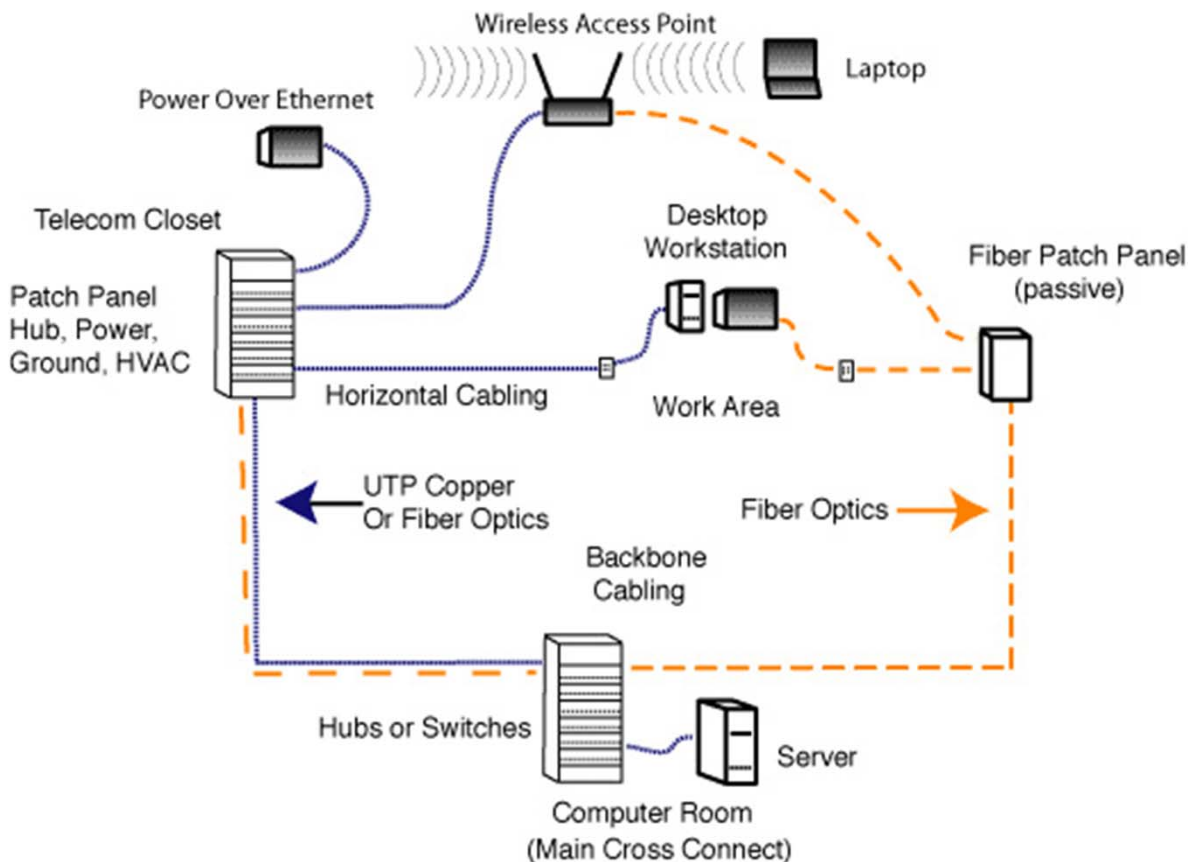

INFORMATION SECURITY

Addikiin's Data Security Services are capable of protecting your critical data from internal and external threats and also offers powered security solutions for the overall systems and network data loss prevention. *'File Security'* solutions are flexible in securing critical files on servers, storage devices and content repositories. To fix any security related issues , we provide:

❑ Firewalls

❑ Virtual Private Networks (VPN)

❑ Intrusion Detection
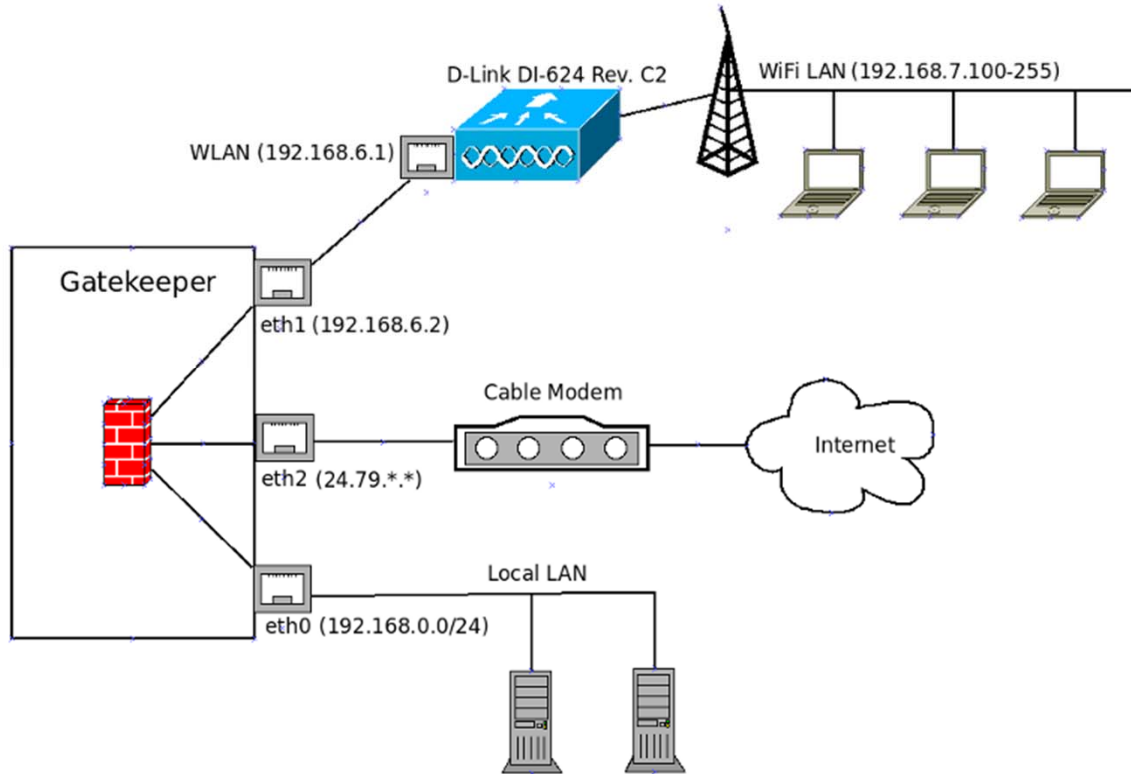

❑ Anti Virus

STRUCTURED CABLING SYSTEM

Addikiin offers high quality and no-risk cabling solutions that seamlessly blends amidst the company's IT infrastructure and enables smooth functioning of the systems within. Cabling components such as connectors, wall plates, patch panels and accessories combine together to enhance the value of systems and improve the overall network management. These cabling solutions are easy to install, flexible with variety of applications and enable necessary changes.

WIFI LAN / WAN SET-UP

There are different types of networks available amongst which LAN and WAN are most widely used both domestically and commercially. Our LAN and WAN connect services offers **LEASE LINE** & **PRIVATE LINE** CONNECTIVITY which is economical, fast and secure means to link together your enterprise, where users can interact with applications in exactly the same way and at exactly the same speed, regardless of their location.

BENEFITS: (Fast, Easy, Economical, Secure, Flexible and Seamless)
